DOPAMINE2026

MAY 17 - 21, 2026
SEVILLE, SPAIN

Dear Collaborators and Industry Partners,

It is our pleasure to invite you to support our next meeting, which will be held in Seville, Spain from May 17 - 21, 2026. This will be the 7th Dopamine meeting, **the only international meeting dedicated to dopamine research**. Our meeting will provide you with great opportunities to showcase your products and interact with many basic science and clinical researchers and clients.

Of the growing number of researchers who attend our meeting – we expect **approximately 400+ attendees** – many will be interested in discovering the products you have to offer. Our attendees study the brain chemical messenger dopamine, as well as the multiple brain diseases that are associated with dysfunction of this system, namely Parkinson's disease, schizophrenia, drug addiction, attention deficit and hyperactivity disorder (ADHD) and obesity. These studies require many advanced tools and equipment that companies like yours provide.

Our conference will be held at the **Barcelo Sevilla Renacimiento**, a modern, state-of-the-art conference hotel located in the heart of Seville and close to exciting restaurants, bars, and nightlife.

Advertise in our conference program, be an **exhibitor** and display your product, or **sponsor** a portion of the conference and receive extended exposure to the 400+ group of assembled dopamine researchers! Full details can be found in this package.

Your presence at our meeting is a much-appreciated demonstration of your support for dopamine research.

Sincerely,

Charo Moratalla, *Instituto Cajal* & Patricia Gonzalez-Rodriguez, *Instituto de Biomedicina de Sevilla (IBiS)* - Co-Chairs
Louis-Eric Trudeau, *University of Montreal* & David Sulzer, *Columbia University* - Society Directors

What are the Dopamine Meetings?

For over 20 years, the Dopamine Meetings have provided a forum for scientists with diverse backgrounds to interact and share their latest work and ideas, **fostering cross-fertilization among and between diverse basic and clinical approaches** and accelerating the pace of discovery of new cures for diseases associated with dysfunction of the dopamine system.

The first Dopamine Meeting was hosted in Strasbourg, France in 1998. The support of the conference exceeded all expectations with over 400 delegates in attendance and spurred the decision to continue holding meetings. Since then, conference attendance has fluctuated between 400 and 600 delegates. The Meeting rotates between North America and Europe.

The Dopamine Meetings include renowned plenary speakers from around the world, lively poster sessions including hundreds of presentations covering all fields of dopamine research including genetics, electrophysiology, imaging techniques, behavioral analyses, biomarker identification and pharmacology and novel therapeutics.

Who is organizing the conference?

The **Dopamine 2026 Meeting** is organized by a team of renowned scientists based mainly in Europe under the leadership of Dr. Charo Moratalla from Instituto Cajal, and Dr. Patricia Gonzalez-Rodriguez from the Instituto de Biomedicina de Sevilla (IBiS), both located in Seville, Spain, with support for the Dopamine Society directors.

The overall **conference planning process** is organized by the team at Podium Conference Specialists.

Who attends the conference?

The conference draws an international mix of scientists, clinicians and other health professionals such as nurses and physiotherapists, patients, graduate students, postdoctoral research fellows, scientists from the industry (biotech and pharma) and members of charitable organizations, all actively engaged in dopamine research.

Past conferences drew **scientists, postdoctoral fellows and students** studying a broad range of research topics including genetics, electrophysiology, imaging techniques, behavioral analyses, biomarker identification, pharmacology and novel therapeutics. Examples of previous sessions include:

- Novel techniques to image dopamine release
- Functional diversity of dopamine signaling
- Dopamine receptor complexes
- Selective neuronal vulnerability in Parkinson's disease
- The dopamine system in gambling
- Regulation of dopamine autoreceptors
- Shaping of synapses and circuits by dopamine
- Dopamine and memory updating
- Missense mutations in the dopamine transporter gene
- Molecular diversity of dopamine neurons
- Dopamine and flexible decision making in humans
- Stress-induced dopamine neuroplasticity
- Genetic dissections of dopaminergic pathway in addiction

WHY SPONSOR?

WHY SPONSOR?

Connect with **leading and emerging** researchers

-Over 400 attendees from the various fields of brain disease attend this conference

Premium **branding & positioning** opportunity

- As a conference sponsor, your brand will be exposed to over 1500 members of the Dopamine community via email blasts to the database
- Choose a sponsorship level to fit your budget

Face time with leading scientists

-Exhibitor options allow you an opportunity to increase your company's recognition, introduce your new products to the community, and differentiate your company from your competitors
